

7th-8th September 2025

Total Lunar Eclipse

A lunar eclipse occurs when the Earth comes between the Sun and the Moon, causing its shadow to fall on the Moon.

*Not to scale

There will be a **total lunar eclipse** on the night of 7-8 September 2025, which will be visible from all over India.

We encourage everyone to go outside and see this eclipse with your own eyes!

This is the longest total lunar eclipse since 2022. You will have to wait till 31 December 2028 for the next one, so don't miss this!

Lunar eclipses are safe to see with the naked and unaided eye.

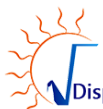

Eclipse Stage	Date	Time (IST)
Penumbral Eclipse begins	7 Sept	20:58
