

Catalysing Rubin Science in

the Asia-Pacific

A collaborative, interdisciplinary and hands-on workshop bringing together students and researchers to explore the LSST Data Preview 2 (DP2) data and alerts.

Participants will get a chance to:

-  Explore Rubin DP2 data and alerts to tackle exciting research questions.
-  Develop collaborative research projects and publications.
-  Build and contribute to open-source astronomy software.

Topics include:

- ✓ Galactic science
- ✓ Time domain/ transients
- ✓ Multiwavelength astronomy
- ✓ Solar system
- ✓ Software development
- ✓ Extragalactic/Cosmology
